

# Rental & Staging

## Project brief introduction

iSEMC provides video display solutions for concerts, conferences, trade shows, rallies, and other events. Our video walls are dependable, easy to install, and will provide you with the stunning impact you require. iSEMC Rental and Staging solutions give you the durability, efficiency, and serviceability you need for your event.

## Features

### 01 Stunning Visuals

Your LED video walls need to give stunning visuals all the time and every time. High brightness levels and perfect pixel pitch help your content shine. We've included features such as ratcheting cabinet locks, anti-collision edges, and onboard corner protection to ensure your equipment keeps providing you with stunning visuals despite the rigors of installation and disassembly.

### 02 Speedy Assembly and Disassembly

Your video set up and taken down quickly and with the minimum of hassle is critical to meeting your event deadlines. Our systems are straightforward to assemble and simple for your stage-hands to understand. The components are lightweight and have many features that assist single-person assembly, including universal modules, two-sided connectors, easy-to-use angle blocks, and magnet-assisted frames and modules.

### 03 Built-In Protection

Creativity is crucial for providing your audience with breathtaking and high-quality broadcasts. Just as important is the visualization technology you use to bring that creativity to life. Excellent visualization is key to setting the scene for an incredible production.

### 04 Versatility

In live TV broadcasting, downtime is not an option. Our display solutions are designed with in-built power and video redundancy, meaning you get continuous operations 24/7. Ensure you have total reliability for your mission-critical broadcast applications.
